

## Land cover (detailed map, 2011)

This map is the classification of land cover created by NOAA Coastal Change Analysis Program (C-CAP) (2011). Guam land cover was classified into 18 classes, not all of which are represented in southern Guam. For more information see C-CAP website (<http://www.csc.noaa.gov/digitalcoast/data/ccapregional/>).

- |                      |                                |
|----------------------|--------------------------------|
| Bare land            | Palustrine emergent wetland    |
| Cultivated land      | Palustrine forested wetland    |
| Developed open space | Palustrine scrub/shrub wetland |
| Forest               | Pasture                        |
| Grassland            | Scrub / Shrub                  |
| Impervious surface   |                                |

Cartography and design
