

Topography

Elevation range (greyscale)

This map shows the elevation of terrain in southern Guam. It was created from a 2-meter resolution LiDAR-derived DEM, by means of GIS spatial analysis techniques. LiDAR data were collected in 2007 by JALBTX for the Government of Guam. The DEM is depicted as a range of shades of grey based on elevation above sea level.

Cartography and design
by Danko Taborosi
and Maria Kottermair,
2015.

This map is for awareness and educational
purposes only. It contains no authoritative positional
or other information. See the full disclaimer at
